Execution Screenshots: End-to-End Recommendation Data Pipeline

Roll No: 2025AG05312 | AIML ZG529 Data Management for Machine Learning, Assignment 2

GitHub repository: https://github.com/jayatimishra/dm4ml-recsys-2025AG05312

All screenshots were taken on my own machine: terminal output from running each stage in order from an empty data folder (commands in docs/RUN_AND_SCREENSHOT.md), then the Prefect UI, the MLflow UI and the HTML validation report from the same run.

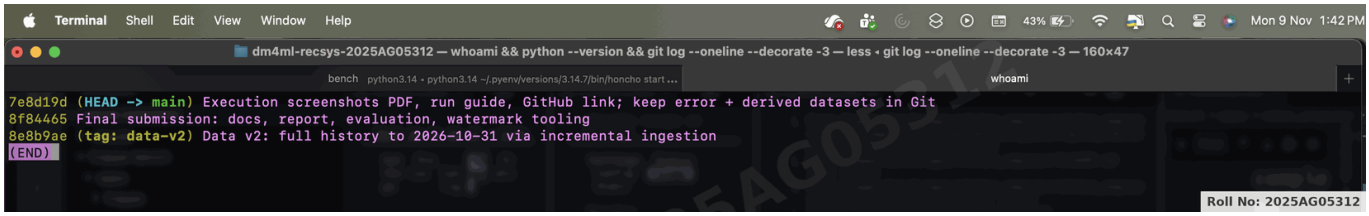

#	Stage	Command
0	Setup	`whoami && python --version && git log --oneline --decorate -3`
1	Source systems	`python -m src.ingestion.generate_sources --end-date 2026-11-01`
2	1 Ingestion	`python -m src.ingestion.ingest --mode incremental`
3	2 Validation	`python -m src.validation.validate`
4	3 Preparation	`python -m src.preparation.prepare`
5	4 Transformation	`python -m src.transformation.transform`
6	5 Feature store	`python -m src.features.feature_store`
7	6 Pre-training checks	`python -m src.validation.pre_training_checks`
8	7 Training	`python -m src.training.train`
9	8 Evaluation	`python -m src.evaluation.evaluate`
10	9 Serving	`python -m src.serving.serve --batch`
11	10 Orchestration	`python dags/run_pipeline.py | python dags/prefect_flow.py`
12	11 Versioning	`dvc dag && dvc status && git tag`

Every stage completed successfully; the full-DAG run in section 10 reports SUCCESS for all 10 tasks.

Roll No: 2025AG05312

Setup

Environment and Git history (tags data-v1, data-v2)

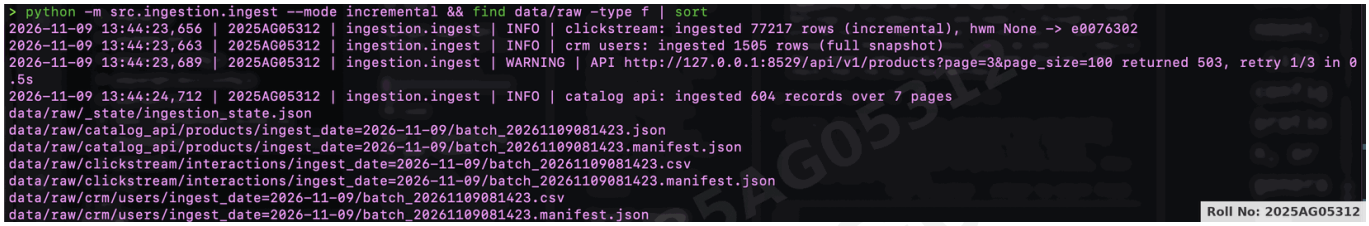

1. Data ingestion

Synthetic source systems generated (documented, seed 529)

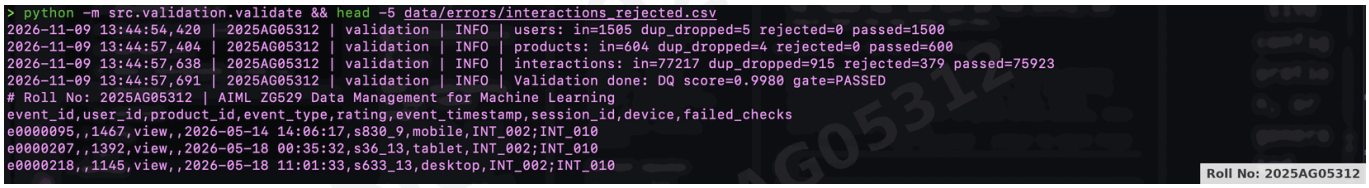

Ingestion of CSV exports + paginated REST API into the partitioned raw zone

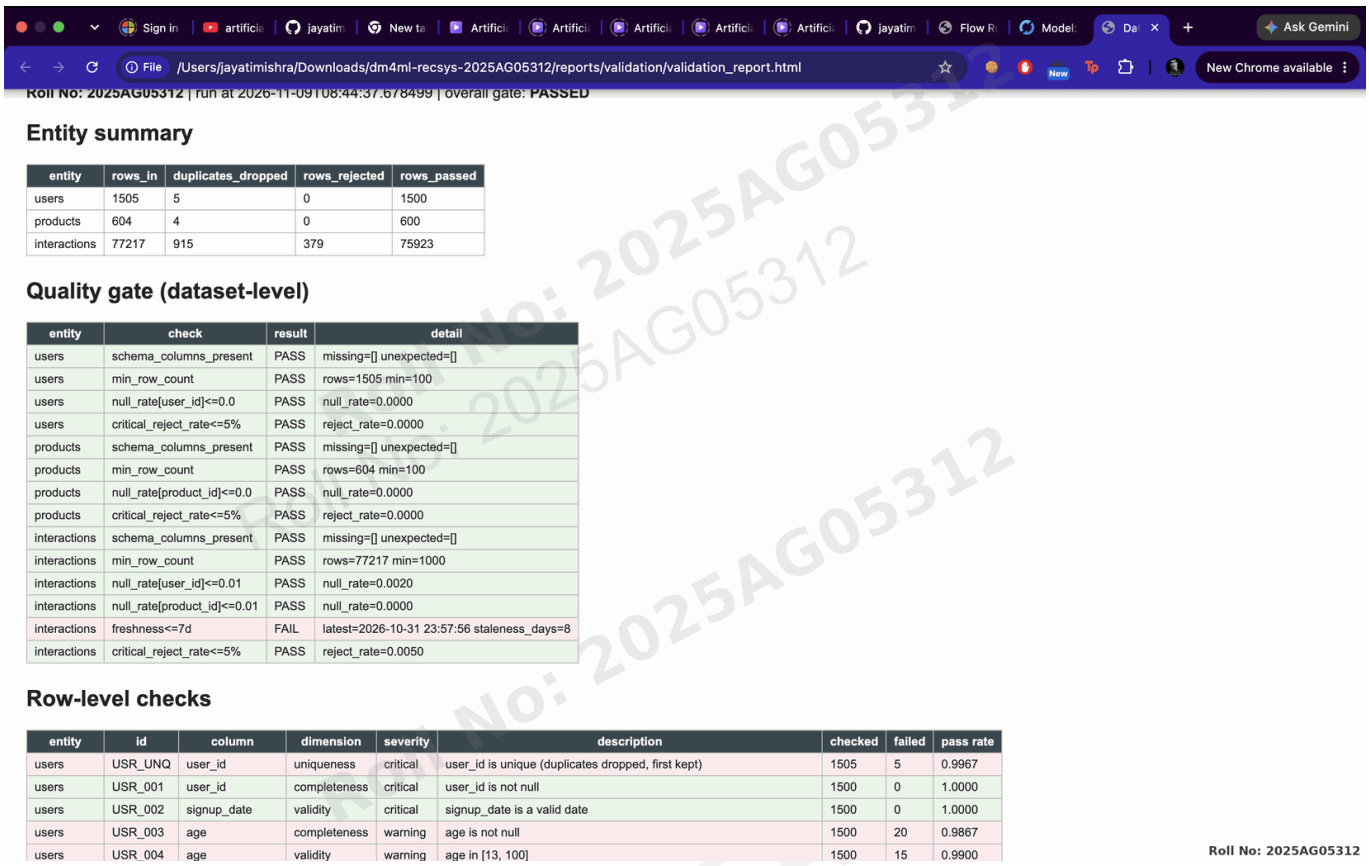

The WARNING line is the deliberate HTTP 503 from the mock API, recovered by retry with backoff.

2. Data validation

Validation run, quality gate and the error dataset (data/errors)

Validation report (reports/validation/validation_report.html)

Roll No: 2025AG05312 | run at 2026-11-09T08:44:37.678499 | overall gate: **PASSED**

Entity summary

entity	rows_in	duplicates_dropped	rows_rejected	rows_passed
users	1505	5	0	1500
products	604	4	0	600
interactions	77217	915	379	75923

Quality gate (dataset-level)

entity	check	result	detail
users	schema_columns_present	PASS	missing=[] unexpected=[]
users	min_row_count	PASS	rows=1505 min=100
users	null_rate[user_id]<=0.0	PASS	null_rate=0.0000
users	critical_reject_rate<=5%	PASS	reject_rate=0.0000
products	schema_columns_present	PASS	missing=[] unexpected=[]
products	min_row_count	PASS	rows=604 min=100
products	null_rate[product_id]<=0.0	PASS	null_rate=0.0000
products	critical_reject_rate<=5%	PASS	reject_rate=0.0000
interactions	schema_columns_present	PASS	missing=[] unexpected=[]
interactions	min_row_count	PASS	rows=77217 min=1000
interactions	null_rate[user_id]<=0.01	PASS	null_rate=0.0020
interactions	null_rate[product_id]<=0.01	PASS	null_rate=0.0000
interactions	freshness<=7d	FAIL	latest=2026-10-31 23:57:56 staleness_days=8
interactions	critical_reject_rate<=5%	PASS	reject_rate=0.0050

Row-level checks

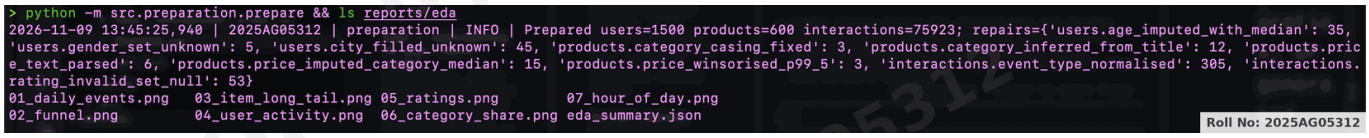

entity	id	column	dimension	severity	description	checked	failed	pass rate
users	USR_UNQ	user_id	uniqueness	critical	user_id is unique (duplicates dropped, first kept)	1505	5	0.9967
users	USR_001	user_id	completeness	critical	user_id is not null	1500	0	1.0000
users	USR_002	signup_date	validity	critical	signup_date is a valid date	1500	0	1.0000
users	USR_003	age	completeness	warning	age is not null	1500	20	0.9867
users	USR_004	age	validity	warning	age in [13, 100]	1500	15	0.9900

Roll No: 2025AG05312

freshness<=7d shows FAIL because the synthetic event log ends on 31 Oct and this run was on 9 Nov (8 days stale). Freshness is a warning-level gate check by design, so the overall gate still PASSED; in production this would alert that the upstream export has stopped arriving.

3. Data preparation

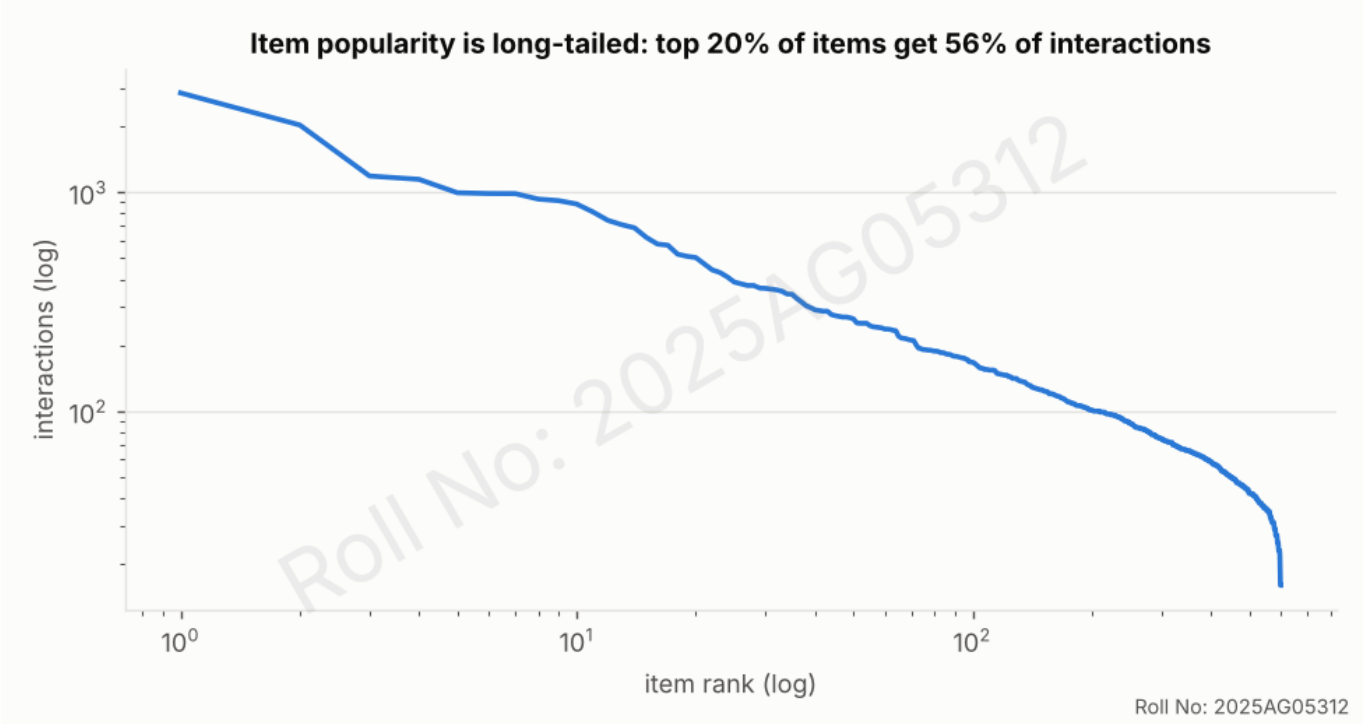

Cleaning, standardisation and EDA

```
> python -m src.preparation.prepare && ls reports/eda
2026-11-09 13:45:25,940 | 2025AG05312 | preparation | INFO | Prepared users=1500 products=600 interactions=75923; repairs={'users.age_imputed_with_median': 35,

```

Roll No: 2025AG05312

5. Feature management

Feature registry, offline/online materialisation and an online lookup

```
> python -m src.features.feature_store && head -20 reports/feature_catalog.md
2026-11-09 13:46:27,532 | 2025AG05312 | features | INFO | Feature store: 37 features in 4 views; {'user_profile_behaviour': {'valid': 1500, 'train': 1500, 'serv
e': 1500}, 'item_popularity_quality': {'valid': 600, 'train': 600, 'serve': 600}, 'user_item_interaction': {'valid': 26433, 'train': 33353, 'serve': 40220}, 'us
er_category_affinity': {'valid': 9371, 'train': 10891, 'serve': 11883}}
<!-- Roll No: 2025AG05312 -->
# Feature catalog

Generated from the feature registry (`data/features/registry.db`). All features are computed point-in-time in the warehouse (`src/transformation/sql/features.sq
l`) and served from the offline store for training and the online store for prediction.

## user_profile_behaviour (v1)

User demographics and engagement behaviour aggregated up to as_of. Entity key: `user_id`. Source table: `feat_user`. TTL: 30 days. Owner: ml-platform (2025AG053
12). Definition hash: `ff4af9216c56`.

| Feature | Type | Description | Used by |
|---|---|---|---|
| `u_n_events` | int | Total events by the user | serving enrichment / analysis |
| `u_n_views` | int | Product views | serving enrichment / analysis |
| `u_n_carts` | int | Add-to-cart events | serving enrichment / analysis |
| `u_n_purchases` | int | Purchases | serving enrichment / analysis |
| `u_conversion_rate` | float | Purchases / views | serving enrichment / analysis |
| `u_avg_rating_given` | float | Mean explicit rating the user gave | serving enrichment / analysis |
| `u_n_distinct_items` | int | Distinct products interacted with | serving enrichment / analysis |
| `u_active_days` | int | Distinct active days | serving enrichment / analysis |
| `u_days_since_last_event` | float | Recency in days at as_of | serving enrichment / analysis |
```

Roll No: 2025AG05312

6. Pre-training validation

Pandera schemas, temporal leakage check, PSI drift

```
> python -m src.validation.pre_training_checks
2026-11-09 13:47:12,516 | 2025AG05312 | validation.pre_training | INFO | pandera:train_interactions            PASS
